REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant's invention is directed to Storage Services wherein based upon user's request a proposal is made. If the user's requirements cannot be satisfied, next-best storage set-up proposal, which satisfy the users' requirements to a considerable extent but not perfectly, is presented to the user. An administrative computer, which manages usage of storages, always keeps track of the usage by monitoring the storages at any time. In creating the proposed storage set-up, if the storage set-up, which satisfies the requirements by the user requesting the storage set-up, can be created by changing an existing user's storage set-up, the SSP proposes that storage set-up to the user. If the user requests a new set-up and the user's requirements are satisfied by changing the existing user's use conditions, the SSP presents the proposed set-up for changing use conditions. If the existing user agrees with a change of conditions based on the proposed set-up, the SSP informs to the user requesting the storage set-up that the

storage area can be configured based on the created set-up. The SSP applies a discount to the existing user, who agreed with the change, in return.

Claim 8 is method claim, and Claim 3 is the system claim of the method claim 8.

Prior Art Johnson (US Patent 6,067,525) teaches:

system and method for providing the storage rental services for the storage operational system, which administers the computers and the storage devices connected to the computers;

getting information on said current status of storage usage of said storage devices;
getting the users' set-up requirements for said storage devices;

creating proposed set-ups for storage spaces on said storage devices based on said set-up requirements by the users and said information on current status of storage usage of said storage devices for presenting to the users;

setting prices to be charged to the users for the said created proposed set-ups of said storage spaces on said storage devices

making the users select any of said created, proposed set-ups of said storage spaces on said storage devices; and

setting said storage spaces on said storage devices depending on the selection.

Prior Art Johnson (US Patent 6,067,525) does not teach:

creating next-best proposed set-ups partially satisfying said users' requirements for set-ups by following said procedure for creating proposed set-ups if all of said requirements cannot be satisfied, and are presented to the users,

negotiating with other users, which already have assigned storage devices, about modification to the use conditions for storage devices assigned to them to change the set-ups for said storage devices assigned to such other users;

changing the set-ups for storage devices assigned to the other users depending on the result of the negotiation; and

applying discount prices for the usages of said storage devices by users issuing set-up requirements based on the change to the set-ups of the other users.

Prior Art Carino et al. article The Data management Service Provider teaches:
